

# **Concentrate-DB**

One Bag Mix "OBM" System

275 # in a 700 Gallon Batch

Lesser amounts are used for microbatches

## **DESCRIPTION**

As part of our *OBM-System* product line, *Concentrate-DB* is an adhesive product designed to fill those niches not adequately satisfied by standard starch-based corrugating adhesive. *Concentrate-DB* is a complete carrier product which requires only warm water to activate. Once completely dispersed and hydrated, *Concentrate-DB* is mixed with unmodified cornstarch to provide a complete corrugating adhesive.

## **CUSTOMER BENEFITS**

- Eliminates critical/precise mixing cycle requirement – freeing up the starchman to perform other duties
- Avoids unnecessary chemical inventories
- *Plant safety is enhanced*
- Reduces adhesive storage requirement and spoilage

## **FEATURES**

- Simplicity of preparation
- Complete carrier starch
- Eliminates critical mixing sequences
- Eliminates the handling of caustic soda
- Allows the formulation of smaller batches of corrugating adhesives

## **PACKAGING**

 Dry Product

**Color:** White
