

Defoamer

Adhesive Stabilizer

1/2-2 1/2 #'s in a 700 Gallon Batch in the Final Adhesive

DESCRIPTION

Defoamer is an effective anti-foam ingredient which can be added to the adhesive in the mixing vessels or during use on the corrugator. Many boxplants provide their operators with squirt bottles to facilitate anti-foam action in the glue pans. *Defoamer* is designed to work well in the alkaline adhesive environment.

CUSTOMER BENEFITS

- Effective anti-foam protection
- Consistent performance
- Rapid defoaming action

FEATURES

- Concentrated product
- Precise quality control
- Quick dispersion in alkaline adhesive

PACKAGING

 Liquid
