

Harlo-Cide Green

Starch Adhesive Preservative
4½ ounces in the Final Adhesive
Adhesive Stabilizer

DESCRIPTION

Harlo-Cide Green is a preservative with broad-spectrum activity which will control the growth of a wide range of microorganisms including bacteria, mold and yeast. The active ingredient is designed for use as a preservative of industrially prepared water based suspensions. It is most effective when the pH is alkaline, as it is in corrugating adhesives. *Harlo-Cide Green* is FDA approved for food packaging adhesive as well as meeting all Federal and state guidelines, including Proposition 65, and CONEG legislation.

CUSTOMER BENEFITS

- Effective microbial control
- Excellent starch adhesive preservative
- Easy to use
- *Safe to use*

FEATURES

- Broad spectrum activity
- Manufactured for maximum effect in an alkaline environment
- Handy soluble packs
