

Hydratite-599

Performance Resin

50 – 150 #'s per 700 Gallon Batch

DESCRIPTION

Hydratite-599 is a liquid modified polyphenolic resin product which is designed to provide drier, firmer corrugated board. Due to its unique ingredients, the dehydration process of corrugating adhesive is greatly enhanced, yielding higher production speeds. The polyphenolic ingredients accelerate the chemical bonding properties that starch adhesive exhibits toward paper substrates. By exploiting this technology HARPER/LOVE ADHESIVES can provide productivity benefits with a convenient, easy to use liquid product.

CUSTOMER BENEFITS

- Drier, firmer board
- Enhanced downstream efficiency
- Ease of use, compatible with automatic starch kitchens
- Visual assurance of use
- Higher production speeds

FEATURES

- Polyphenolic resin ingredients
- Accelerates glue line dehydration
- Crosslinking ingredients
- Convenient liquid form
- Distinctive brown color
- *Very safe to use*

PACKAGING

 Liquid

Color: Brown
